

Mobile Command

MCV-900/SP First Responder

Communication and coordination at an incident scene or public function is critical to the success of an operation. SIRCHIE manufactures a full line of Mobile Command Vehicles from SUV based first responder units to large Mobile Communication Centers. All vehicles are equipped with reliable auxiliary power supplies, climate-controlled systems and the required communication gear to effectively control a critical incident.

Radio Operator Area

Mobile Command Cabinet

Multi-functional storage cabinet that can turn any SUV into a First Responder Command Vehicle. Slide out storage drawers are mounted on heavy duty, double action, ball bearing slides to support the weight of required equipment. Supplied standard with flip-up Dry Erase Command Boards, this cabinet allows the field commander to react quickly and effectively to an emergency situation.

The Dodge Sprinter based command vehicle provides a full stand-up operations area in an intermediate sized vehicle that is very maneuverable and easy to drive. The standard layout includes two (2) radio operator positions and a rear conference area. An on-board generator fueled from the vehicle fuel tank provides the 120V AC power for the office type fluorescent lighting, roof mounted air conditioner, and all auxiliary equipment. Ample storage is provided via wall mounted cabinets, a base cabinet, and storage within the bench seats.

- Durable FRP Wall Finishes.
- Industrial Rubberized, No Slip Flooring.
- Security Bulkhead.
- 12V DC Fluorescent Task Lighting.
