

Technology on the Move

All **SIRCHIE** Surveillance Vehicles integrate the latest in digital technology with reliable power systems and climate controlled interiors to provide an effective and comfortable work environment. Our in-house construction of all vehicle components including periscope, work consoles, control panels, bench seating, bulkheads etc... allows us to continually adapt to the changing video equipment, audio recorder and computer systems that are utilized in the vehicles. Our ability to adapt to changing technologies is what has made **SIRCHIE** the longest active supplier of Law Enforcement Surveillance Vehicles.

Optional Extended Length Van with Dual (2) Operator Positions and Retractable Periscope.

Clearly Labeled Control Panels with Circuit Breaker / Switches to operate and protect on-board equipment.

The Trade Van Platform remains the most popular disguise for Surveillance applications nationwide. Their unassuming and common appearance does not draw attention, thus making them effective from the inner city to rural towns.

- Single operator (Standard) and dual (2) operator position models available.
- Ergonomic equipment mounting and control layouts.
- Recording equipment selection based on ease of operation, quality of recording and most current technology.
- Low profile, remote control periscope with handheld, graduated speed, joystick controller.
- Contoured wall panels to provide maximum interior space.
- Optional retractable periscope and compressor driven air conditioner available.

Standard MSV-500 Interior Layout.

A suitable disguise for virtually any environment, **SIRCHIE's** SUV 5000 incorporates one of today's most popular SUV's with the latest in digital video technology, making it one of our most proficient surveillance systems available. Proven effective in the field, the SUV 5000 provides a safe and easy to use, climate controlled platform that does not compromise the comfort of the operating officer. By utilizing the factory third row seating, this package is designed to offer a wide array of recording possibilities partnered with plenty of leg and elbowroom.

- Dedicated and separate battery banks for the vehicle electronics and climate control systems.
- Additional flat panel monitors and DVD recorders optionally available.
- Compressor driven air conditioner and electric heater to maintain a comfortable interior.

Easy to Access Operator's Console.

- HDD/DVR Multiplexer recorder allows for the monitoring and recording of up to eight (8) camera or video inputs at the same time.
- Camera ports in bulkhead, left and right windows and rear hatch can provide full 360 degree observation and recording capabilities.
- Standard 19" EIA rack mounting of equipment for easy service or upgrading of equipment as technology changes.
- Ample work counter space for carry-on laptops, body wire equipment or for report writing.

Forward View from 3rd Row Operators Seat.

Stable and Adjustable Monopod Camera Mounts.

Surveillance Vehicles

MSV-200 Mini Van Series

The minivan has once again created a suitable host for a Surveillance Conversion. Ideal for use in suburban areas where a work truck disguise may draw attention, these soccer mom units can house a complete compliment of surveillance equipment and provide full size van results.

View From Operator Seating

View From Side Door

MSV-500 RV Recreational

Surveillance Vehicles

View From Rear

Operator Seating Positioned for Easy Access to All Equipment.

- Interior configurations can be custom tailored to individual requirements.
- Accommodation of department supplied radio's, MDT's, computers, etc...
- Unsurpassed factory technical support from the longest active manufacturer of law enforcement surveillance vehicles.
- Full 360 degree viewing capability via window and bulkhead camera ports.

The ideal disguise for resort and vacation areas, the RV style surveillance van has all the same capabilities of a standard van in a vehicle with increased headroom for added comfort. The vehicle also features full 360-degree window observation due to installation of bay windows.

- Sprayed-in foam insulated walls, contour formed to vehicle to provide the most complete insulation and useable interior space.
- Recessed mounting (below floor) of primary battery system to preserve interior van space for equipment and storage.
- Controls and equipment ergonomically arranged for easy operation.
- Added head space and higher periscope observation views.
- Spacious work counter.

MSV-500/U Utility Body

Rack Mount Equipment Suite

Open countertop design allows space for equipment such as a briefcase-style body wire gear, microwave video receivers and telemetry control equipment.

- Lockable exterior cabinets allow easy access for battery and equipment maintenance.
- Welded tubular steel frame construction of consoles, bench seat and cabinets for strength and durability.
- Office style interior with ample work space and storage cabinetry.
- Adaptable to multiple applications such as covert command or hostage negotiations.
- Available with optional motorized periscope system.

Larger commercial vehicles are ideal for multiple operators and other applications such as covert command or hostage negotiations. These higher profile vehicles are equipped with upper panel windows to accommodate standard camera mounts or optional motorized pan / tilt mounts.

- Full stand-up headroom.
- Ideal platform for multi-jurisdictional operations.
- Commercial grade chassis and suspension provides a stable work platform.

Upper compartment windows provide an excellent location for auxiliary cameras or directional microwave antennas.
