- Durable, Metal Cabinet Construction designed for years of service.

The Vehicle Division of Sirchie has developed and manufactured vehicles for Fire Scene Investigations, Emergency Response, Bomb Response, etc... longer than any other specialty vehicle manufacturer. With the unique knowledge of **SIRCHIE's** full line of forensic equipment, communication systems, emergency lighting, and support materials, the vehicles are provided as complete and fully interoperable units.

Whether a suspected arson scene or a catastrophic event involving an incendiary device, these units can be equipped for rapid mobilization. **SIRCHIE** provides response units from First Responder SUV's and Midsize Cutaways to large truck chassis models in excess of 30 feet long.

Available in 16', 18' and 20' work area models, the floor plans can be tailored to individual department's equipment and requirements. Available features such as over cab storage, front bumper mounted winch, electric / hydraulic lift gates, mast mounted video systems etc... these Bomb Response Units can double as a Command Vehicle and be utilized in the roughest terrain.
