

# Evidence Packaging, Labeling & Sealing

The proper collection, handling, labeling, transportation, and storage of evidence is critical to maintaining the integrity of any criminal case. It can mean the difference between conviction and acquittal.

When collecting evidence, it's important to think about:

- What types of evidence you'll be handling
- Whether the packaging needs to "breathe"
- Physiological considerations for protection and contamination process
- The correct container to preserve the integrity of the evidence
- The climate and weather conditions of your geographic area

 **Note:** Integrity seals help ensure evidence integrity with tamper proof properties. Look for this icon for tamper proof integrity products.

## Evidence Collection Course

Law Enforcement Professionals operate in an increasingly complex environment where budgets are tight, crime scenes are complicated, and the public expects investigations to lead quickly to justice. Our popular Evidence Collection Accelerated Training Class gives you hands-on experience in limited class sizes covering the scientific methods of collection, identification, evaluation, and preservation of physical evidence. Our students love the teach-do method of instruction and take their knowledge back to the field as lifelong Sirchie graduates.

No. CST100

Evidence and Handgun Storage

Evidence Locker

Our Evidence Lockers are designed for secure evidence storage and management. Once collected, the evidence is placed within one of the eight compartments. The door is locked and the key is dropped through the slot into the locked compartment, thereby preventing evidence tampering. The integrity of the evidence is preserved until the property custodian returns to duty with the master key. This method simplifies and ensures that critical chain-of-custody is maintained. Overall Dimensions: 15.125" x 20.125" x 17.25" (38.4cm x 51.1cm x 43.8cm); Weight: 45 lbs. (20.4kg).

SS8E Features:

- Heavy duty security doors constructed of 14 gauge cold rolled steel
- Continuous pin steel piano hinge
- Double outer walls constructed of 20 gauge cold rolled steel
- Finish consists of a phosphoric etching primer with a minimum 2 mil (.002") topcoat of baked polyurethane industrial enamel
- Each compartment measures 6" x 4" x 15.5" (15.2cm x 10.2cm x 39.4cm)
- Handgun locker compartment floor is cushioned with felt

----------	-----------------

Handgun Locker

In any courtroom, prison facility, or general law enforcement office today, there are processing areas where short-term, secure handgun storage is mandatory for the safety of law enforcement personnel and the general public. To meet this requirement, Sirchie manufactures a heavy-duty, eight-compartment handgun locker. Overall Dimensions: 15.125" x 20.125" x 17.25" (38.4cm x 51.1cm x 43.8cm); Weight: 45 lbs. (20.4kg).
