

Magnifiers & Comparators

The smallest details and minutiae in evidence can lead to a match, an identification, and the establishment of justice. Our magnifiers and comparators are used globally to examine evidence, and trusted by examiners and technicians to help them execute their mission.

We have the right tools for you backed with a full line of Latent Fingerprint and Footwear Examination Classes to help you build your skills.

From our comprehensive line of hand-held magnifiers to advanced digital and video-based comparators, we have the right solution for your classification and comparison needs.

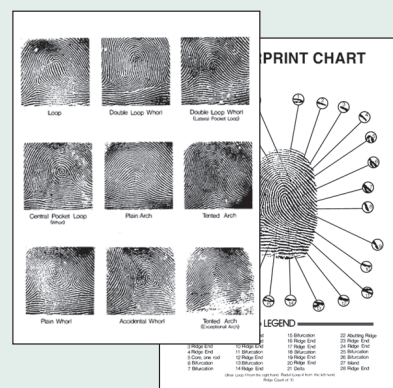

Introduction to the Science of Fingerprints Course

The first in a series of 6 fingerprint classes, this course introduces the science of fingerprint identification that's based on the uniqueness and permanence of friction ridge structures. The ability of the technician to accurately classify and identify fingerprint patterns is essential.

The student will learn fundamental techniques of fingerprint pattern interpretation and how this information is used to accurately classify, compare, and identify fingerprints.

For more information about this and all other training courses, visit www.sirchie.com or call us at (800) 356-7311.

Magnifiers

Ridge Pro Plus Digital Magnifier

This powerful, hand-held digital magnifier offers a 5-inch wide-screen LCD screen with up to 14x magnification for easy examination. Features include the ability to capture and send an image via USB port, store up to 80 images, built-in stand & lights, built-in handle for field use, and more.

No. FXM50A Ridge Pro Plus Digital Magnifier

Professional Fingerprint Magnifier

Our most popular magnifier, the JC100P is sturdy, rugged and built for years of use. An optional locking ring will ensure your setting is maintained. Precision focus with four available classification discs: The Henry Disc, the Battley Disc, the Henry/Battley Disc, and the Miracode Palm Disc.

No. JC100P	Professional Fingerprint Magnifier
No. JC101LR	Locking Ring
No. JC101H	Henry Disc
No. JC101B	Battley Disc
No. JC101HB	Henry/Battley Disc
No. JC101M	Miracode Disc

M1 and M2 Fingerprint Magnifiers

Our M1 and M2 magnifiers have superb image clarity and sharpness and feature fine focusing and a lock ring. Both magnifiers provide 4.5x magnification while the M2 features a height adjustment knob. Also available are compatible classification discs: The Henry Disc, the Battley Disc, the Henry/Battley Disc, and the Miracode Palm Disc.

No. PFP100	M1 Fingerprint Magnifier
No. PFP200	M2 Fingerprint Magnifier
No. PFH10	Henry Disc
No. PFB11	Battley Disc
No. PFHB12	Henry/Battley Disc
No. PFM13	Miracode Disc

Rack & Pinion Focus Fingerprint Magnifier

Featuring a two-element 4.5X magnification system with a smooth rack-and-pinion focusing mechanism, this system will ensure you have sharp clear images. Also available are compatible classification discs: The Henry Disc, the Battley Disc, the Henry/Battley Disc, and the Miracode Palm Disc.

No. JC200	Rack & Pinion Focus Magnifier
No. JC201H	Henry Disc
No. JC201B	Battley Disc
No. JC201HB	Henry/Battley Disc
No. JC201M	Miracode Disc

Ridge PRO Fingerprint Magnifier

Our premium product in our magnifier line, the Ridge PRO is lightweight for its size but rugged and built for hard use. Its textured rubber barrel makes it easy for you to maneuver and with a rubber guard, it's comfortable for the eye and face. The magnifier has a 3X magnification and a 2" wide lens that makes it virtually distortion-free.

No. RPM350

Ridge PRO Fingerprint Magnifier

Wide-Field Fingerprint Magnifier

Study a much larger field of view with this magnifier. Images will appear sharp and clear over the entire viewing area and a thumbscrew allows fast and simple focus. It features 3.2X magnification. Available classification discs include: The Henry Disc, the Battley Disc, the Henry/Battley Disc, and the Miracode Palm Disc.

Dual Magnification Fixed Focus Magnifier

This magnifier gives you two options of magnification: 3.5 and 7. It's intended to verify fingerprints and documents with security features.

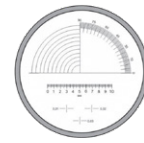

No. FM1005 **Dual Magnification Fixed Focus Magnifier**

Fixed Focus 10X Magnifiers

Perfect for small security features or details with up to 10x magnification. You have the flexibility to choose from multiple options:

- A measuring disc for precise examination
- A white light source
- A diopter adjustment and two white light sources
- A white light source and measuring disc
- Two white light sources, a diopter adjustment, and a measuring disc

Ridge Counters

Reversible Ridge Counter

A long-time favorite is back by popular demand! This indestructible ridge counter features a reversible point that stows neatly inside the body when not in use.

No. RC221 **Reversible Ridge Counter**

Retractable Ridge Counter

This counter features a push-button retractable point, which can be replaced.

No. GL004 **Retractable Ridge Counter**

No. GL0051 **Replacement Point**

Fixed Focus Compact Device Magnifiers by Regula

These compact magnifiers are ideal for documents with security features, such as passports, ID cards, drivers licenses, and signatures. These devices can detect main security features in printing, compare sizes, and detect mechanical and chemical alterations in document structure. Has up to 10x magnification (20x magnification in some models) and has several different options so you have the flexibility to get what you need:

- White and 365nm UV lights
- White light, 365nm UV lights and a measuring disc
- White lights, 365nm UV lights and retroreflective light
- White lights, 365nm UV lights, retroreflective light, and a measuring disc
- White light, 365nm UV light, and IR Anti-Stokes visualizer
- White light, 365nm UV light, IR Anti-Stokes visualizer, and a measuring disc
- White light, 365nm UV, 313nm UV, 254nm UV light, retroreflective lights, and a IR Anti-Stokes Visualizer
- White light, 365nm UV, 313nm UV, 254nm UV light, retroreflective lights, IR Anti-Stokes Visualizer, and a measuring disc
- White light, 365nm UV lights and a polarizing filter
- Two white lights, 254nm, 313nm, 365nm, 400nm, retroreflective, IR Anti-stokes, and holographic and OVD visualization, and measuring disc.
- Two white lights, 254nm, 313nm, 365nm, 400nm, retroreflective, IR Anti-Stokes, holographic & OVD visualization
- Up to 20x magnification with white and 365nm UV lights
- Up to 20x magnification with white and 365nm UV lights, and a measuring disc

Miscellaneous Magnifiers

Magni-Focuser

Have your hands free with these binocular lenses on an adjustable padded headband. You can wear it over your eyeglasses and the lens will flip up when you're not using them.

No. JC110

Magni-Focuser

Stand Magnifier

This sturdy 4X magnifier is a good all-round choice for laboratories or classrooms. It also has a wide-field viewing.

No. JC5428

Stand Magnifier

Acrylic Magnifiers

View evidence with as much light as you can in your environment. These magnifiers gather surrounding light and concentrate it on the area below the magnifier base. With 4X magnification and a wide-field viewing, several people may view evidence at the same time.

No. JC349M

2 1/2" Acrylic Magnifier

No. JC350M

3 1/2" Acrylic Magnifier

Professional Folding Magnifier with Case

Have your magnifier always with you with this compact 5X magnifier which folds up. It stores in its vinyl case.

No. 313M

Professional Folding Magnifier w/case

Attached Case Magnifier

The perfect size for kits or to carry in your pocket with this inexpensive 1 3/4" diameter lens.

No. 379M

Attached Case Magnifier

Retractable Magnifier

You'll get a full 2X magnification over a larger viewing area (2 3/4" x 1 1/2"). It retracts easily to fit in your pocket.

No. 325M

Retractable Magnifier

Flashlight Fingerprint Magnifier

This illuminated magnifier offers 5x magnification. Requires 2 D cell batteries, not included.

No. 314M

Flashlight Fingerprint Magnifier

Illuminated Fingerprint Magnifying Glass

Slip this magnifier in your jacket or pocket so you'll have it on you anywhere. It has a built-in illuminator and a powerful 4X lens in a tough, plastic case.

No. JC7538

Illuminated Fingerprint Magnifying Glass

Illuminated Swing Arm Magnifier

The 360-degree illuminated swing arm magnifier attaches to almost any desk or tabletop to easily examine evidence. It features two light options: white light and UV with three diopters of magnification.

No. 465MA

Illuminated Swing Arm Magnifier, 110V

No. 465MA220

Illuminated Swing Arm Magnifier, 220V

Comparators

Illuminated Comparator

This magnifier offers wide-field view magnification and a goose neck assembly with a lamp head to help reduce your eye strain. The enlarged viewing base and 9" viewing height gives you flexibility to work with larger evidence.

No. 365M

Illuminated Magnifier, 110V AC

No. 365M220

Illuminated Magnifier, 220V AC

Forensic Optical Comparator

Under normal circumstances, examining evidence is a tedious eye-straining chore with hours spent peering through a microscope or magnifier. Not anymore. The Comparator takes the "chore" out of close and careful evidence examination and comparison. Its features are:

- It puts the evidence upfront in a clear, crisp, magnified image
- Two prints have a side-by-side image display (no overlapping!)
- Control knobs let you switch between 6.5x and 10x magnification
- Available in 110V and 220V

No. FX8B

Forensic Optical Comparator, 110V AC

No. FX8B220

Forensic Optical Comparator, 220V AC

Digital Forensic Evidence Examination Station

The Digital Forensic Evidence Examination Station makes evidence examination more efficient and it's easy to use for forensic physical examination, which takes many forms, shapes, and sizes. New 1080HD Display!

You need this station if you examine:

- Tools and toolmarks
- Fingerprint/palm print record cards and latent prints
- Footprint evidence
- Trace evidence: hair, fibers, glass fragments, soil, etc.
- Documents: printed and handwritten
- And much more

With this station, forensic examiners will have:

- The ability to view small details with a moveable viewing table and fully adjustable magnification – up to 50X.
- A wide range of color correction, brightness, and contrast on an oversized 22-inch LCD, high-definition viewing screen.
- Plenty of room on the mounting table to exam 3D objects. Magnets can also secure evidence to the evidence platform.
- Connect and control from any computer with the FXE350 software, which is included. You can use your own computer to turn the station's lights on and off, adjust screen colors, pause the camera, and adjust the brightness of the images.

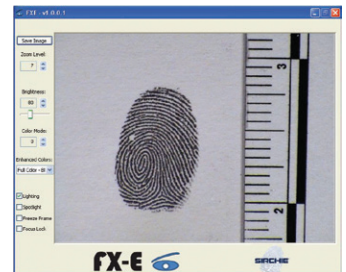

No. FXE350A Digital Forensic Examination Station w/capture software

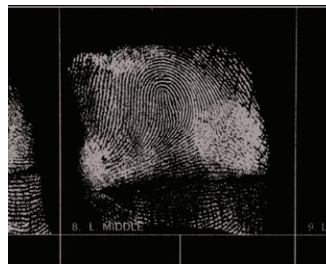

Fully adjustable magnification (up to 50X) allows you to examine minute details of forensic evidence

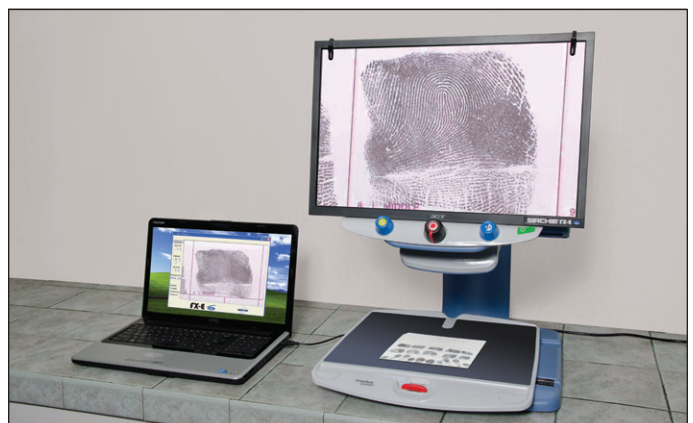

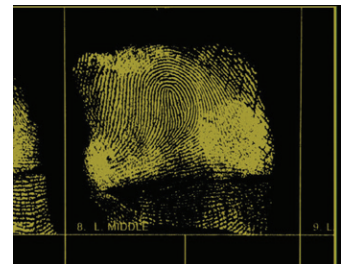

Moveable work table is fully adjustable

User-friendly capture software included

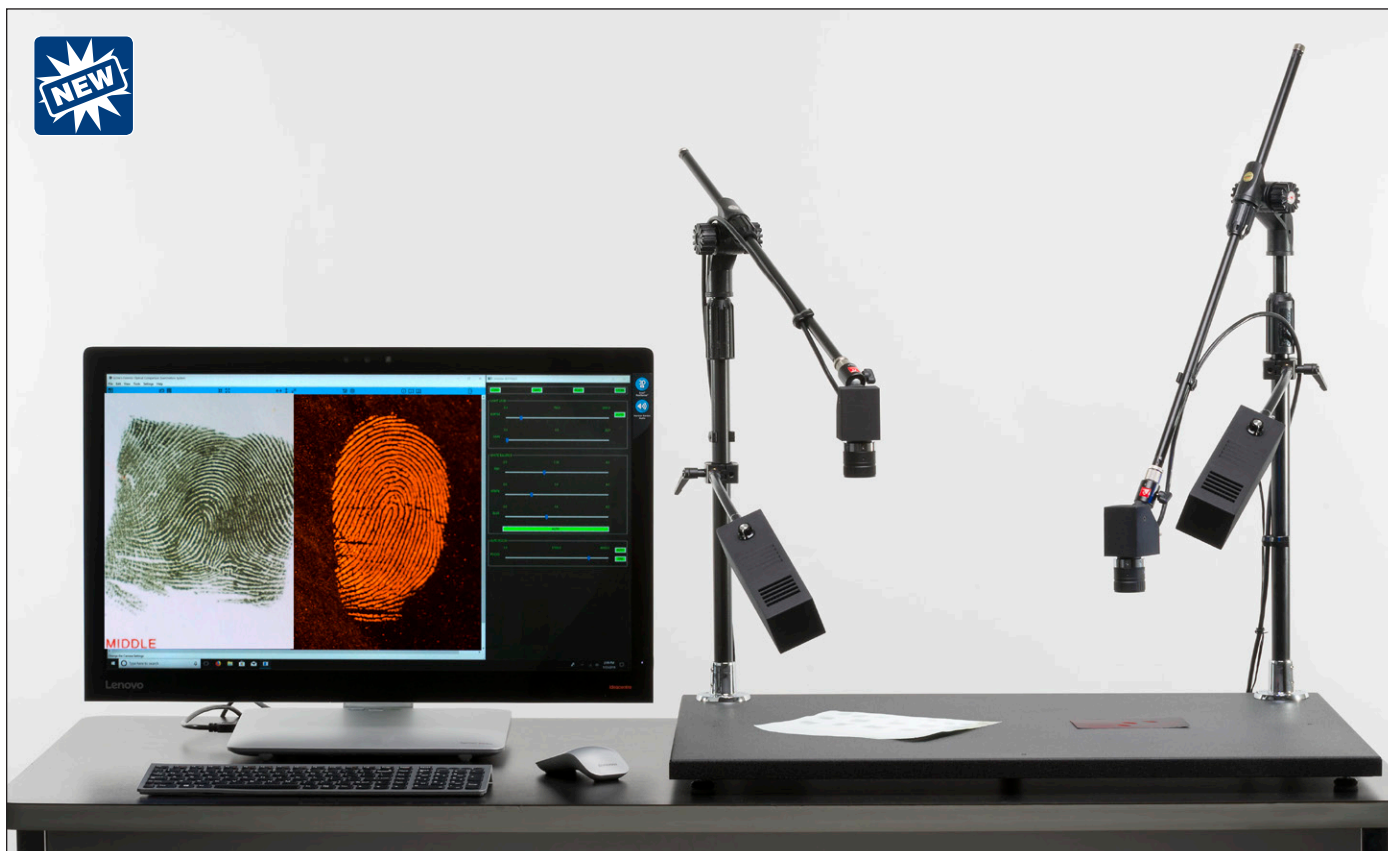

Use onboard controls to adjust brightness, contrast & reverse or colorize picture

FXE350A Digital Forensic Evidence Examination Station includes Digital Screen Capture. Laptop computer not included.

FOCOS+ Dual Camera Forensic Comparator

With the FOCOS+, examiners can easily compare two pieces of evidence with this efficient tool. Two 15 MP cameras are mounted side-by-side on swing arms so examiners can adjust cameras in an unparalleled range of motion to view all physical evidence. The FOCOS+ system includes two LED ALS lights that can be switched between white, blue (460nm), green (520nm), and UV (370nm).

Precisely adjust both camera positions using the top bubble level and the 180-degree ball mount.

LED lights can be switched between white, 460nm blue, 520nm green, and 370nm UV.

System includes two each yellow, orange, and red camera barrier filters for use with alternate light sources.

Key features include:

- Two 15 MP mounted cameras with auto-focus lens
- Included camera barrier filters for improving contrast and viewing fluorescence (2 each of yellow, orange, red)
- Integrated diffuser for soft even light over surface
- Cameras have a 180 degree ball mount for flexibility in examining evidence and getting multiple angles (oblique, overhead, and side lighting)
- Easily rotate between various wavelengths with a side switch.
- An integrated PC with a 27" monitor and software to view and capture software to view, rotate, reverse, calibrate, save, import and export images.

No. FOCOSP1000

FOCOS+ Dual Camera Forensic Comparator
