

# Theft Detection & Questioned Document Analysis

## VISIBLE AND FLUORESCENT INVISIBLE DETECTION MATERIALS

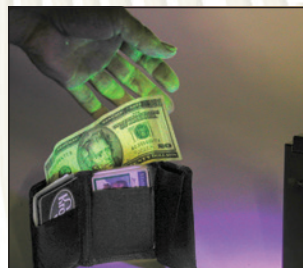

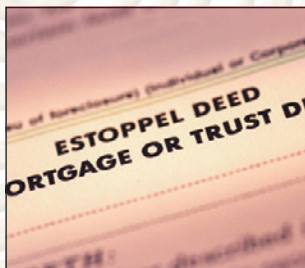

A frequent and serious problem confronting investigators worldwide is that of forming a logical or natural association between a suspect, an object and a location with regard to a particular crime.

Visible and fluorescent invisible powders, pastes, dyes, crayons, ink markers and other tagging devices, in many cases, may serve as invaluable assistants to the investigator in establishing a link to a suspect, object or location. Some of the crimes that lend themselves to visible and fluorescent invisible tagging and tracing are:

- *Petty Theft • Shoplifting • Coin Box Tampering • Money Laundering*
- *Illegal Drug Transactions • Sexual Crimes • Repeated Burglaries*
- *Firearms and Weapons • Tampered Documents • Kidnapping*
- *Food Stamp Fraud • Industrial Theft • Trailing • Industrial Espionage*
- *Fire Alarm Boxes • Arson • Prostitution • And Many Other Applications*

## QUESTIONED DOCUMENT ANALYSIS

As an investigator processes a crime scene, evidence collected within documents can often be vitally important to aid in building the case. Sirchie offers tools and kits to assist in the analysis of handwriting, typeset, indented writing restoration, and erased writing detection, along with master kits to give the investigator a full range of questioned document analysis tools.

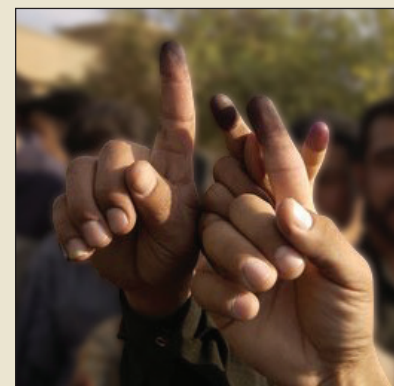

# Theft & Fraud Detection

## VISA VOTING INTEGRITY SYSTEMS APPLICATION

**SIRCHIE®** has been involved in assisting election commissions around the world with their voter integrity issues for more than 20 years.

There are two methods that may be utilized. The first uses a visible dye solution which is easily applied, readily seen and resists removal with soap and water and common solvents for up to 48 hours. The second method employs an invisible solution which is visible only under ultraviolet illumination and, therefore, is extremely hard to remove (it is difficult to remove what can't be seen).

SIRCHIE has been careful to formulate solutions that provide sufficient coverage to meet the needs of the election, but will not permanently deface or damage skin tissue. Material Safety Data Sheets are available for each solution. Call us for more information and pricing at 919-554-2244.

## Theft & Fraud Detection

A hand that's been in contact with No. UV201 shows a brilliant green in response to longwave UV exposure.

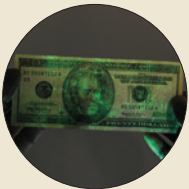

### HOW CLUE SPRAY™ WORKS:

Hand after contact with Clue Spray™ under UV light.

## Fluorescent Invisible Detection

### FLUORESCENT INVISIBLE DETECTION POWDER

Powders are compounded in various natural colors to blend with diverse object backgrounds to reduce visual detection. The chart below lists the powder's natural color, the color it fluoresces, and recommended applications. Good adhesion properties aid in target-to-hand, body, or clothing contact. Apply a light dusting to the target object with a soft bristle brush. Highly fluorescent when exposed to longwave ultraviolet radiation using any **SIRCHIE®** longwave (UV) light source. Packaged in 2 oz. (30ml) volume containers.

CAT. NO.	NATURAL COLOR/ FLUORESCENT COLOR	GENERAL APPLICATION	PRICE
UV201	Pale Green/Brilliant Green	Currency, Paper, Clothing, Light-Colored Surfaces	
UV202	White/Brilliant Blue/White	Documents, Books, White Surfaces and Clothing	
UV203	Pale Yellow/Brilliant Yellow	Manila Papers, Envelopes, Clothing	
UV204	Black/Brilliant Green	Floors, Telephones, Black Surfaces	
UV205	Pale Blue/Brilliant Green	Military Clothing, Rugs, Blue Surfaces	
UV206	Salmon/Bright Orange-Red	Fire Boxes, Cardboard, Wood, Buff Surfaces	
UV207	Gray/Brilliant Green	Cans, Silver Coins, Any Gray Surface	
118L		Applicator Brush	

### CLUE SPRAY™ FLUORESCENT INVISIBLE DETECTION POWDER

Powders are packaged in an easy-to-use aerosol spray container so they may be used on porous or non-porous surfaces. These extremely fine particle powders blend easily on almost any object. The light buff color is almost invisible on a black or white-colored surface. They are highly fluorescent when exposed to longwave (UV) radiation. Simply spray on any surface—leaving a very fine film, which, when touched, transfers to skin, clothing or other objects. CLUE SPRAY™ is packaged in 6 oz. aerosols. Use CLUE SPRAY™ on carpets, tile, wood and just about any walking surface with limited access for tagging and tracing. Best used indoors as rain and wind can displace CLUE SPRAY™.

CAT. NO.	DESCRIPTION	NATURAL/FLUORESCENT COLOR	PRICE
UVA201	CLUE SPRAY™, 6 oz.	Light Buff/Green	

# Fluorescent Invisible Detection & Marking

## FLUORESCENT INVISIBLE DETECTION PASTE

Use detection paste in situations where powders and powder aerosols are inappropriate due to air circulation, air moisture content or where target object surface condition prohibits its application. Detection paste is suitable for outdoor applications. It is water-resistant and will remain transferrable for prolonged periods of time. It has the consistency of ordinary automobile grease. Apply a thin film on target objects using disposable vinyl or latex gloves. Paste is excellent for use on door knobs, locks, alarm pulls, secure phones and vehicles both indoors and outdoors. Tube packaging allows for controlled application. Use with any **SIRCHIE®** longwave (UV) light.

CAT. NO.	NATURAL/FLUORESCENT COLOR	DESCRIPTION	PRICE
UVT208	Neutral/Brilliant Green, 2 oz.	Fluorescent Invisible Paste	
UVT210	Buff/Brilliant Yellow, 2 oz.	Fluorescent Invisible Paste	
UVT211	Gray/Brilliant Green, 2 oz.	Fluorescent Invisible Paste	
KCP160C	Applicator Swabs, 100 each		

## FLUORESCENT INVISIBLE METAL MARKING INK

This is a highly fluorescent, yet invisible ink used primarily for placing identifying marks on all metals. The ink is fast-drying, permanent and may be applied with a cotton swab or fine-pointed brush. The ink fluoresces a brilliant blue/white when exposed to longwave (UV) or shortwave (UV) radiation.

CATALOG NO.	DESCRIPTION	PRICE
UV7311	Fluorescent Invisible Metal Marking Ink, 1 oz. (30ml)	

## FLUORESCENT INVISIBLE COIN LACQUER

This is a frost-colored lacquer that rapidly dries clear, leaving an invisible but highly fluorescent tag. It is used primarily on coins involving vending machines and parking meters in tagging/tracing situations. Apply with a swab or brush. It fluoresces a brilliant green when exposed to either longwave (UV) or shortwave (UV) radiation.

CATALOG NO.	DESCRIPTION	PRICE
UV7321	Fluorescent Invisible Coin Lacquer, 1 oz. (30ml)	

## FLUORESCENT INVISIBLE WRITING INK

This is an outstanding ink for permanently marking legal papers, stocks and bonds, currency and other documents with completely invisible tagging and identification marks. Use with a cotton swab, bladder-type fountain pen or even a toothpick for writing. Markings are highly fluorescent when exposed to longwave (UV) or shortwave (UV) radiation.

## FLUORESCENT INVISIBLE TAGGING SEQUENCE

1. Untreated door knob.

2. Door knob treated with paste.

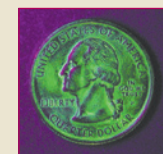

3. Contact made with door knob.

4. Paste viewed under ultraviolet light.

Scissors treated with No. UV7311 as viewed in natural light (left). Scissors treated with No. UV7311 as viewed under ultraviolet light (right).

Coin tagged with No. UV7321 under normal light (left) and UV light (right).

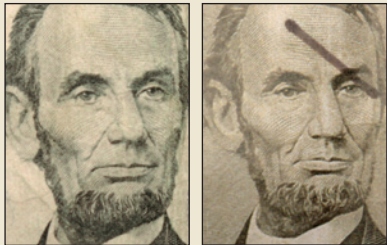

Twenty dollar bill treated with No. UV734 as viewed under normal light (left) and UV light (right).

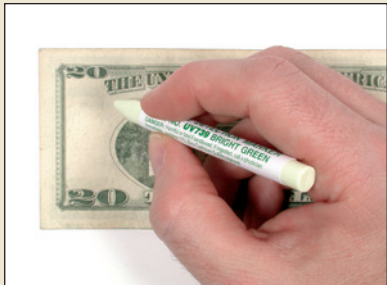

## Theft & Fraud Detection

A mark made with the No. UV700 Invisible Marking Pen is viewed under ultraviolet light.

Marked bill on left has a light amber marking indicative of real currency, while the marking on the right bill has turned black indicating counterfeit currency.

Markings made with our invisible fluorescent crayons are only visible under UV light.

Markings made with the No. TDTUV100 are invisible under normal lighting.

Under fluorescent UV lighting markings made with the No. TDTUV100 appear.

## Fluorescent Invisible Marking

### FLUORESCENT INVISIBLE MARKING PEN

This all-purpose pen may be used for marking just about any porous material with an invisible, permanent, highly fluorescent tag for identification and tracing. Permanently marks paper, cardboard, cloth, wood and other porous materials. Markings may be removed from glass, plastics, metals and other non-porous materials. Markings fluoresce a brilliant blue/white when exposed to longwave (UV) or shortwave (UV) radiation.

CATALOG NO.	DESCRIPTION	PRICE
UV700	Fluorescent Invisible Marking Pen	

### UNIVERSAL COUNTERFEIT DETECTOR PEN

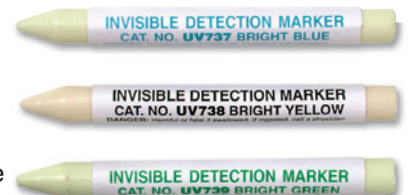

Mark any currency (*except Canadian*) for immediate counterfeit detection. If markings stay amber, currency is legitimate. If markings turn black or brown, currency is suspect.

CATALOG NO.	DESCRIPTION	PRICE
CDP101	Universal Counterfeit Detector Pen	

### INVISIBLE FLUORESCENT CRAYONS

Crayons may be used effectively to mark currency, paper and cardboard products, clothing, plastic products and other porous or non-porous materials for tagging and tracing purposes. Markings are water-resistant and highly fluorescent when exposed to longwave (UV) or shortwave (UV) radiation.

CAT. NO.	DESCRIPTION	FLUORESCES	PRICE
UV737	Ivory White Invisible Fluorescent Crayon	Bright Blue/White	
UV738	Pale Yellow Invisible Fluorescent Crayon	Bright Yellow	
UV739	Pale Green Invisible Fluorescent Crayon	Bright Green	

### FLUORESCENT INVISIBLE PAINT MARKER

This UV marker is perfect for applying invisible markings on non-porous surfaces such as metal, plastic, glass, ceramic, rubber and stone. Its fast-drying, xylene-free paint conforms to safety standards such as California Proposition 65 and EPA HAPS and SARA 313. Markings are invisible under normal light, but brightly fluoresce under UV illumination. Marking temperature range: -50°F to 150°F (-46°C to 66°C). **Not recommended for use on skin.**

# Fluorescent Invisible Marking

## Theft & Fraud Detection

### FLUORESCENT INVISIBLE SKIN MARKING INK (PASS IN-PASS OUT)

This highly fluorescent invisible skin marking ink can be swabbed, dabbed or stamped on the skin. It dries immediately with no visible trace and fluoresces a brilliant blue/white when exposed to longwave (UV) radiation. Use fluorescent invisible skin marking ink with an ultraviolet light to control access or egress at facilities such as prisons, detention houses and other control areas. Identifying dates, times and other symbols are easily changed with a combination of stamps and stamp pads.

CATALOG NO.	DESCRIPTION	PRICE
UV743E	Fluorescent Invisible Skin Marking Ink, 16 oz. (473ml)	
UV743EL	Fluorescent Invisible Skin Marking Ink, 32 oz. (946ml)	

### FLUORESCENT INVISIBLE TAGGING INK COMBO

With the refillable marking pen in the UVC100 kit, invisible tagging and identification of any surface is possible. Use it on glass, all metals, rubber, vinyl, ceramic, cloth (natural or man-made fibers) cardboard and paper. Markings fluoresce a brilliant blue-white and dry on any surface very quickly.

CATALOG NO.	DESCRIPTION	PRICE

## Fluorescent Invisible Detection

### DUAL WAVELENGTH POSITIVE DETECTION KIT

This kit offers dual wavelength tagging powders and paste along with a selection of **SIRCHIE®**'s standard longwave fluorescent detection products. Utilization of the dual wavelength fluorescent materials and their unique color response to longwave and shortwave UV radiation establishes, beyond reasonable doubt, target contact. Inclusion of a dual-wavelength (longwave and shortwave) UV light source adds portability for field use.

UVFT2000

ThiefCatcher™ II Invisible Theft Detection Kit

## VISIBLE STAIN DETECTION POWDERS

Visible Stain Detection Powders should only be used indoors, subject to the statements regarding their use in the discussion to the right. A visible stain powder should be selected based on its natural color blending with the color of the target object. It should be carefully dusted on the object with a soft applicator brush. When contact with the object is made, a transfer occurs. When the transferred powder contacts moisture, such as perspiration, facial fluids or water, the powder goes into solution and a resulting vivid color appears.

*Tagging materials, compounded of aqueous dyes, are used primarily in those situations where there is no reasonable assumption of a suspect.*

*Major considerations before applying visible stain detection materials are:*

1. The object to be treated, if POROUS, will be permanently discolored and probably unserviceable. Materials such as paper, cardboard, textile products and thermoplastics fall into this category.
2. NON-POROUS materials such as steel, glass, thermoset plastics, and painted metal or wood surfaces usually may be restored or cleaned when required.
3. Powders should not be used on objects that are subject to air flow as airborne stain detection particles could contaminate large areas. In situations where air flow is possible, only VISIBLE STAIN PASTE should be used.
4. When in doubt, use only non-destructive fluorescent invisible detection materials.

### VISIBLE STAIN TAGGING SEQUENCE

1. Untreated doorknob.

2. Doorknob treated with visible stain detection paste (No. VST313).

3. Contact result after exposure to moisture.

## Visible Stain Detection

### VISIBLE STAIN DETECTION PASTE

Detection pastes may be used indoors or outdoors without regard to air circulation. Consideration for rain or high moisture and air content should be addressed before applying pastes to a target object since the dye in the compound is water soluble (see previous page). Simply squeeze a small amount of paste on the target object in the area that a hand would have to touch, and spread a thin, even coat that will blend with the object's color. ALWAYS protect hands with disposable gloves when performing this task. If the target object is touched, transfer will occur and the aqueous dye in the paste will go into solution with perspiration, facial fluids or water with a resulting vivid color appearing.

- 1- VS301 Green Visible Stain Powder, 2 oz. (59ml)
- 1- VS302 Mahogany Visible Stain Powder, 2 oz. (59ml)
- 1- VS304 Silver Visible Stain Powder, 2 oz. (59ml)
- 1- VS306 Copper Visible Stain Powder, 2 oz. (59ml)
- 1- VST309 Brown Visible Stain Paste, 2 oz. (59ml)
- 1- UV201 Pale Green Fluorescent Invisible Detection Powder, 2 oz. (59ml)
- 1- UV202 White Fluorescent Invisible Detection Powder, 2 oz. (59ml)
- 1- UV203 Pale Yellow Fluorescent Invisible Detection Powder, 2 oz. (59ml)
- 1- UVT208 Neutral Fluorescent Invisible Detection Paste, 2 oz. (59ml)
- 1- UVT210 Buff/Brilliant Yellow Fluorescent Invisible Detection Paste, 2 oz. (59ml)
- 1- UVT211 Gray Fluorescent Invisible Detection Paste, 2 oz. (59ml)
- 1- UVA201 CLUE SPRAY™, 6 oz. (177ml)
- 1- UV739 Pale Green Invisible Fluorescent Crayon
- 1- UV700 Fluorescent Invisible Marking Pen
- 1- CUV100T Longwave UV Mini Light Source
- 4- KCP230 AA-Cell Batteries, Alkaline
- 4- 118L Regular Powder Brushes
- 20- KCP210 Cotton-Tipped Applicator Swabs
- 1- SF00771 Disposable Latex Glove Pair
- 1- UVS900C Professional Black Molded Copolymer Carrying Case, textured w/folding handle and locking latches, includes custom insert; Dimensions: 14" x 10.75" x 5.75" (35.6cm x 27.3cm x 14.6cm); Weight: 7.4 lbs. (3.3kg)

## Visible Stain Detection

### MASTER VISIBLE STAIN DETECTION KIT

Components in this complete tagging kit include a comprehensive selection of visible stain powder and pastes including **SIRCHIE®**'s three day transparent detection fluid. All the necessary applicator brushes and swabs are included. It is an excellent choice for public and private institutions.

CATALOG NO.	DESCRIPTION	PRICE
VS300	Master Visible Stain Detection Kit	

### ALL PURPOSE DETECTION KIT

Fluorescent invisible and visible powders, pastes, dyes, crayons, ink markers and other tagging devices can serve as valuable assistants to the investigator in establishing a link to a suspect, object or location. The **SIRCHIE All-Purpose Detection Kit** equips an investigator with the tools necessary to resolve crimes related to property theft. A battery-operated longwave UV light is included for field use.

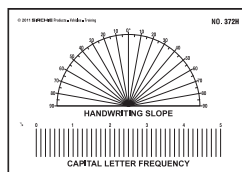

CATALOG NO.	DESCRIPTION	PRICE
UVS900	All-Purpose Detection Kit	

### SLOPE PROTRACTOR AND LETTER FREQUENCY TEMPLATE

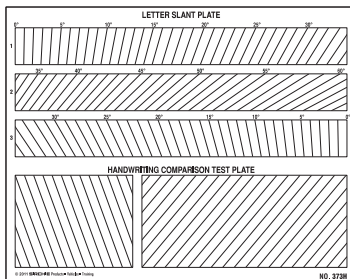

The upper portion of this polyester film template is used to determine the slant angle of handwriting in either direction. The lower section is used to determine letter frequency or the space factor of handwriting. Dimensions: 7"H x 5"W (17.8cm x 12.7cm)

CATALOG NO.	DESCRIPTION	PRICE
372H	Slope Protractor & Letter Frequency Template	

### HANDWRITING LETTER SLANT & COMPARISON TEMPLATE

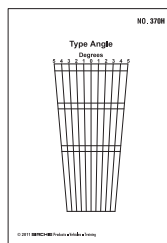

The upper portion of this polyester film template is used to determine the slant angle of handwriting, up to 60° clockwise and 35° counterclockwise. The larger lower section is used to rapidly compare slant angle between questioned and known samples of handwriting. Dimensions: 10"W x 8"H x (25.4cm x 20.3cm)

CATALOG NO.	DESCRIPTION	PRICE
373H	Handwriting Letter Slant & Comparison Template	

### TYPE ANGLE TEMPLATE

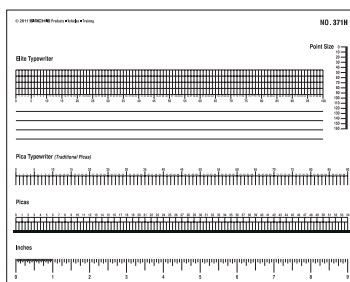

This polyester film template is used to determine the angle of tilted characters, up to 5° in either direction. Dimensions: 7"H x 5"W (17.8cm x 12.7cm)

CATALOG NO.	DESCRIPTION	PRICE
370H	Type Angle Template	

### TYPEWRITER MEASUREMENT TEMPLATE

This polyester film template is used to detect any abnormal horizontal or vertical alignment of typewritten characters. Dimensions: 10"W x 8"H (25.4cm x 20.3cm)

CATALOG NO.	DESCRIPTION	PRICE
371H	Typewriter Measurement Template	

### HANDWRITING ANALYSIS INSTRUMENT

The combination of this unit with reticles makes it a must for any investigator involved in handwriting analysis. An excellent 5X magnifier and any one of 16 transparent analysis reticles may be assembled to make a very convenient handwriting analysis instrument.

CATALOG NO.	DESCRIPTION	PRICE
HC100	Handwriting Analysis Instrument w/16 reticles	

*Document Examination acetate sheets are ideal for direct photography. Fine line and accurate detail permit a more comprehensive analysis of a variety of situations.*

No. HC100 Kit in use

#### FEATURES:

- Extreme accuracy • Position any size document • Low parallax • Pull or twist focusing • No special light source required • Small, light and rugged • Pocket model

## IRS1001 CONTENTS:

- 12- 288FP1 Contact Filter Papers, 1" x 2" (2.5cm x 5.1cm)
- 1- IRS100 Indentation Removal Solution, 1 oz. (30ml)
- 6- ISS3 Indentation Solutions, Strong
- 6- ISW1 Indentation Solution, Weak
- 6- KCP210 Swabs
- 12- KCP193 Brush, Applicator 3.25" (8.2cm)
- 1- IRS10011 Carrying Case, Molded Polypropylene w/Molded Plastic Inserts; Dimensions: 8.625" x 4.5" x 1.75" (21.9cm x 11.4cm x 4.4cm); Weight: 0.74 lbs. (0.33kg)

## INDENTED WRITING RESTORATION KIT

Whenever writing is made on a leaf or sheet of a pad or book, not only is the top sheet affected, but the under sheets also receive impressions from which it is possible to determine the text of the original writing. These impressions are called "indented writing" and it is possible to develop these latent impressions with the reagents furnished with this kit. Individual application vials for the reagents provide unlimited storage life.

## EWD1001 CONTENTS:

- 1- 214C1 Iodine Print Fixative, 1 oz. (30ml)
- 1- 215CS1 Iodine Print Fixative Remover, 1 oz. (30ml)
- 1- AMP2066 Iodette Ampoules, 3g, 6 ea.
- 1- CUV100T UV Mini-Light, DC only
- 8- EINK1 Erased Ink #1, 2ml vial
- 8- EINK2 Erased Ink #2, 2ml vial
- 8- EINK3 Erased Ink #3, 2ml vial
- 15- KCP217 Cotton Balls
- 4- KCP230 AA-Cell Batteries, Alkaline
- 1- PFP200 Fingerprint Magnifier, Model M2
- 1- KCP218 Lamp, Fluorescent, Cool White, 4-watt
- 6- ZTE021 Zip-Top Evidence Bags, 9" x 12" (22.9cm x 30.5cm) x 4 mil
- 24- KCP193 Brush, Applicator 3.25" (8.2cm)
- 1- EWD10011 Carrying Case, Molded Copolymer, with Latch; Dimensions: 14.375" x 8" x 7" (36.5cm x 20.3cm x 17.8cm); Weight: 3.8 lbs. (1.7kg)

## ERASED WRITING DETECTION KIT

This is the most complete erased writing detection kit available. It enables the investigator to restore erased writing with chemical or fuming reagents. An ultraviolet light is included for preliminary inspection of the questioned document prior to chemical treatment. A 5X magnifier is a necessary addition to the kit. The ultraviolet light may be converted to white light for microscope illumination. Individual applicator vials are provided for increased storage life and cross-contamination control.

Erased Writing Detection Kit

No. MQDA500 shown with lid open revealing contents inside.

### MASTER QUESTIONED DOCUMENT KIT

Our most complete kit available for the examination and analysis of questioned documents, the MQDA500 includes equipment for color analysis of inks, restoration of altered writing, indented writing, indented writing restoration and thin layer chromatography identification of ballpoint and felt tip pen ink. A combination longwave and shortwave UV light, 5X magnifier, optical analysis instrument and questioned document analysis plates also included.

### MQDA500 APPLICATIONS :

- Thin Layer Chromatography Analysis of Inks
- Erased Writing Detection
- Indented Writing Restoration
- Ink Comparison
- Ultraviolet Examination
- Handwriting and Typewriting Analysis Instruments

### PORTABLE POLICE LABORATORY

The most complete and comprehensive investigation kit available today. Take this kit anywhere and use the large selection of tools to aid your investigation. The reagents provided for testing blood, semen, narcotics and firearms residues are non-destructive contact methods and will not interfere with subsequent, formal laboratory analysis. The tests, when performed in the field, will enable the investigator to search, screen and identify physical evidence. All testing

is performed through the utilization of pre-measured, disposable, non-contaminating ampoules, eliminating the possible contamination or misuse of the reagents. Components can be replenished as you use them.

### 1000M CONTENTS:

- 1- 101L1 Hi-Fi Volcano Latent Print Powder, Silk Black, 1 oz. (39ml)
- 1- 103L1 Hi-Fi Volcano Latent Print Powder, Indestructible White, 1 oz. (39ml)
- 4- 120L Max-Spread Powder Brushes
- 4- 122L1 Kit Size Fiberglass Brushes
- 1- 125L Permanent Magnetic Wand
- 1- 130LB Hinge Lifter, Black, 1.5" x 2" (3.8cm x 5.1cm), 24 ea.
- 1- 130LT Hinge Lifter, Transparent, 1.5" x 2" (3.8cm x 5.1cm), 24 ea.
- 1- 130LW Hinge Lifter, White, 1.5" x 2" (3.8cm x 5.1cm), 24 ea.
- 1- 131LT Hinge Lifter, Transparent, 2" x 4" (5.1cm x 10.2cm), 12 ea.
- 1- 131LT4 Hinge Lifter, Transparent, 4" x 4" (10.2cm x 10.2cm), 12 ea.
- 1- 144L Fingerprint Lifting Tape, Transparent, 1.5" x 360" (3.8cm x 9m)
- 1- 145L Fingerprint Lifting Tape, Frosted, 1.5" x 360" (3.8cm x 9m)
- 1- 146L Lifting Tape Dispenser, 1.5"W (3.8cm)
- 1- 202C Ninhydrin Spray, 6 oz. (177ml) aerosol
- 1- 203CS2 Ninhydrin Fixative, 2 oz. (59ml)
- 1- 214C2 Iodine Print Fixative, 2 oz. (59ml)
- 1- 215CS2 Iodine Print Fixative Remover, 2 oz. (59ml)

- 4- 288LM2 Leucomalachite Ampoule 2
- 4- 288PX1 PX1 Reagent Ampoules, Phenolphthalein
- 4- 288PX2 PX2 Reagent Ampoules, Phenolphthalein
- 1- 317M Magnifier, 2X, 3" (7.6cm) dia.
- 1- 600E Photo Evidence Rule Tape, 1/2" x 30 ft. (1.3cm x 9m)
- 1- VS301 Visible Stain Powder, Green/Purple, 2 oz. (59ml)
- 1- VS302 Visible Stain Powder, Mahogany/Blue, 2 oz. (59ml)
- 1- 603E Evidence Identification Tape, 1" x 500" (2.5cm x 13m)
- 1- VS615 Three-Day Transparent Detection Fluid, Transparent/Black-Brown, 1/2 oz. (15ml)
- 20- 621E1 Heat Seal Evidence Bags, 4" x 9" (10.2cm x 22.9cm)
- 10- 622E1 Heat Seal Evidence Bags, 8" x 12" (20.3cm x 30.5cm)
- 1- UV700 UV Ink Marking Pen
- 1- UV201 Fluorescent Invisible Detection Powder, Green/Green, 2 oz. (59ml)
- 1- UV202 Fluorescent Invisible Detection Powder, White/Blue, 2 oz. (59ml)
- 1- UV7208 Fluorescent Invisible Detection Paste, Neutral/Green, 1 oz. (30ml)
- 1- UV737 Invisible Fluorescent Crayon, White/Blue
- 1- UV738 Invisible Fluorescent Crayon, Yellow/Yellow
- 1- UV339 Invisible Fluorescent Crayon, Green/Green
- 1- CUV100T UV Mini Light Source (longwave), 4-watt
- 1- A211C Iodine Crystal Ampoules, 6 ea.
- 2- ACN2 Acid Neutralizer, 2 oz. (59ml)
- 1- AMP2065 Iodette Ampoules, 3g. 6 ea.
- 15- LPB1001 Lifted Print Backing/Sketch/Record Card, Black 3" x 5" (7.6cm x 12.7cm)
- 15- LPW1001 Lifted Print Backing/Sketch/Record Card, White 3" x 5" (7.6cm x 12.7cm)
- 4- DF201 Fumette Disposable Iodine Fuming Guns
- 2- DISW2 Distilled Water, 2 oz. (59ml)
- 25- EIL011 Evidence Identification Labels, "Crime Evidence"
- 25- FC3301 Criminal Record Cards, Standard, 8" x 8" (20.3cm x 20.3cm)
- 10- FC345L1 Postmortem Record Strips, Left Hand, Standard
- 10- FC345R1 Postmortem Record Strips, Right Hand, Standard
- 20- FIP1C1 Super Cleaner Towlettes
- 1- FIP263 Multi-Mount Injection Molded Cardholder
- 1- PFP700 PrintMate™ Flawless Fingerprint Pad
- 1- FIP2701 Wallet-Type Vinyl Pad Cover
- 1- FIP270A Elimination Pad, 50-Sheet
- 1- GL000 Carbide Tip Scriber
- 1- GL002 Retractable Lifter Knife w/Blade
- 1- GL004 Retractable Ridge Counter
- 1- GRA200 Primer Residue Collection Kit
- 1- KCP110 Scissors, 5" (12.7cm)
- 1- KCP1391 Tweezers, Plastic, 4.75" (12.1cm)
- 1- KCP144 China Marker, Black
- 1- KCP145 China Marker, White
- 2- KCP148 Syringes, 3cc Disposable
- 8- KCP154 Pipettes, with Suction Bulb
- 5- KCP163 Emory Papers, 2" x 3" (5.1cm x 7.6cm)
