

Fingerprint Taking

Modernize your fingerprint taking process for criminal booking & applicant processing with a Sirchie LiveScan System

We designed our LiveScan solutions so you know who you're really dealing with, without all the hassles and expense of over-complicated, over-engineered, or outdated systems. Our systems are:

- **Ready-to-use and FBI-Certified.** Our Criminal Booking and Applicant Record processes are in a turnkey package and already certified by the FBI. You'll be ready to take fingerprints as soon as it is delivered to you.
- **Low maintenance.** When using our system, you won't receive large monthly maintenance fees. Our system requires little maintenance with the same effectiveness as other systems and is friendly to your budget.
- **Less time.** LiveScan is a two-in-one tool since prints are transmitted electronically, there isn't the processing time of inking a person, scanning his or her prints and uploading the prints to databases.
- **Quality fingerprints.** Instant print quality grading to ensure print quality and reduce rejection rate.
- **Secure Transmission.** Compatible with required systems for secure transmission of criminal and applicant transactions.

For more information on our LiveScan Systems contact us at 800.356.7311 or sales@sirchie.com.
