

Expedite Your Applicant Process & Increase Print Quality with the Latest Biometric Collection Technology

Why Choose Us?

- Unparalleled Customer Service
- Affordable Maintenance & Support Options
- Convenient Onsite Training
- Available Print-only Options
- Mobility for Better Accessibility

What Can Sirchie's Live Scan Solution Do For You?

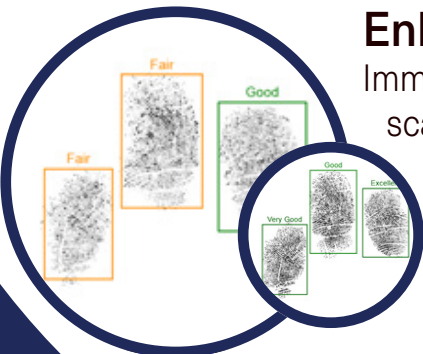

Mobile or Portable Solution:

If you need to process applicants at multiple locations, you could take the laptop, scanner, and signature pad to a different site, process your applicants, and come back to your home office to print FD258 Cards.

Auto Advanced Feature:

Accelerate your recording process via our automatic acceptance tool once print quality equals or exceeds the "GOOD" rating.

Enhanced Print Quality Based on NIST Rating:

Immediately know the NIST rating of print quality during the scanning process instead of being notified weeks after submission of traditional ink prints. If the NIST score is "FAIR" or lower, users can easily recapture higher quality digital prints.

Left image: Initial scan of right fingerprints with two "FAIR" ratings.

Right image: Rescan of same fingerprints with higher ratings.
