

# Quick Release Buckle (No. QRB2) Installation Instructions

## Introduction

Your new Riot Duty Helmet comes with two fastener systems; our standard Double D-Ring, and the Quick Release Buckle. If you prefer to use the Double D-Ring fastener, then your new helmet is ready to use as-is. However, the Quick Release Buckle fastener system requires installation. Follow the instructions below to easily install the Quick Release Buckle.

The Quick Release Buckle consists of three parts; the **Horseshoe**, the **Body**, and the **Arrow**.

To install, first feed the **Horseshoe** through the loop behind the **Double D-Rings** of your helmet.

Then, insert the looped **Horseshoe** into the **Body** until you hear a loud click.

Next, insert the **Arrow** into the opposite end of the **Body** until you hear another loud click.

Then, feed the helmet chin strap through the **Arrow** slot closest to the **Body**.

Finally, feed the helmet chin strap through the second **Arrow** slot, and pull through to adjust for a secure fit.

Your Quick Release Buckle is now installed. To release, simply press the arms at the top and bottom of the **Body**, and pull the **Arrow** and chin strap out.
