## TECHNICAL INFORMATION

### How to Use SEARCH Ink Strips

---

#### PROCEDURE

*NOTE: When pulling the SEARCH Ink Strips apart for use, it is important to do so slowly in order to retain good ink coverage on both strips.*

1. Holding the corner of your SEARCH Ink Strip, slowly pull the two pieces apart to retain good ink coverage.
2. Place the two strips on a hard surface to facilitate fingerprinting.
3. When rolling fingerprints, hold the finger securely, and try to roll from one side of the fingernail to the other. The finger should be kept at right angles to the edge of the slab so that the impression which is made on the ink should be almost square.
4. Use slight pressure when placing the inked finger on the fingerprint card.
5. Easily remove ink residue from fingers and ink slab with water and wipe with a light towel.
